

Multiple postalcodes

Posted by Roelof van den Oever - 06 Feb 2013 09:06

Is there a way to make postalcodes understood by the system?

Example: postalcode 1300 until 1363 all have to show the same article.

Now I only get it to work if I enter all the codes one by one 1300,1301,1311 etc..

Please support!

Thank you

Hi Roelof,

Thanks for purchasing WowLocator.

As of now there is no way to enter all codes in one go. We will try to include this feature in future.

But for now we can do this for you. Send us an email to

This e-mail address is being protected from spambots. You need JavaScript enabled to view it

with admin, database (phpmyadmin) and FTP access.

Regards,

Ronak
